Front USB slot with MP3/WMA compatibility

Many people acquire music as audio files or rip audio files from their CDs, and probably so do you. The Front USB slot supports playback of MP3 and WMA format audio files, so you can store your favorite music on a USB thumb drive and enjoy them in your car. Equipped with lid to keep dust out when not in use.

Front auxiliary input lets you easily connect to external sources

By now you might have a wide variety of music sources, from the latest digital device to the worn-out analog machine. Whatever it is, as long as it has an AUX output or headphone jack, you can easily hook it up to the source unit's AUX input on the front panel, for continued enjoyment.

Low Pass Filter for subwoofer

Switching on the Low Pass Filter (LPF) will send only the low frequency range through specified outputs to ensure superb performance when connected to a subwoofer.

Memory back up

The FZ102E embeds a special flash memory that protects all the user's stored settings and favourites, even if the unit is completely disconnected from the vehicle's power supply.
